Globalisation and the Postcolonial World
The New Political Economy Of Development

Globalisation and the Postcolonial World- Ankie Hoogvelt 2001-06-11 Finally, the conclusions have been rethought in the light of the mushrooming cloud of antiglobalist protests.

Globalisation and the Postcolonial World- Ankie M. M. Hoogvelt 1997 This major introductory text analyses key development issues and debates from the colonial period up to the present. It traces the historical development of capitalism through successive phases of expansion leading to the present ‘implosion’. The book's core focus is on the emergence of a new political economy characterised by flexible accumulation and globalisation, and its differential impact on rising and declining regions of the post-colonial world.

Globalization and Postcolonialism- Sankaran Krishna 2009 Globalization has become a widely used buzzword, yet popular discussions often miss its deeper realities. This book offers the first clear explanation of the impact of colonialist legacies in a globalized world in an era defined by the "War on Terror." Sankaran Krishna explores the history of the relationship between Western dominance and the forms of resistance that have emerged to challenge it. Moving beyond the simple formulation of "They hate us because we are rich, we are free, and they are crazy," he asks, "What have we done that might generate such animosity? What face has the United States presented to the developing world over time? Krishna argues that we live on an interrelated globe, that history matters a great deal in constructing contemporary realities, and that others create stories or narratives about the world based on their experiences just as we do based on ours. He contends that the interactions between the West and the non-West have not been politically innocent, economically egalitarian, or culturally benign in their consequences. Presenting a lucid exploration of the intertwined histories of both globalization and postcolonialism, this book uses compelling real-world examples to make sense of this crucial relationship.

The Postcolonial World- Jyotsna G. Singh 2016-10-04 The Postcolonial World presents an overview of the field and extends critical debate in exciting new directions. It provides an important and timely reappraisal of postcolonialism as an aesthetic, political, and historical movement, and of postcolonial studies as a multidisciplinary, transcultural field. Essays map the terrain of the postcolonial as a global phenomenon at the intersection of several
disciplinary inquiries. Framed by an introductory chapter and a concluding essay, the eight sections examine: Affective, Postcolonial Histories Postcolonial Desires Religious Imaginings Postcolonial Geographies and Spatial Practices Human Rights and Postcolonial Conflicts Postcolonial Cultures and Digital Humanities Ecocritical Inquiries in Postcolonial Studies Postcolonialism versus Neoliberalism The Postcolonial World looks afresh at re-emerging conditions of postcoloniality in the twenty-first century and draws on a wide range of representational strategies, cultural practices, material forms, and affective affiliations. The volume is an essential reading for scholars and students of postcolonialism.

**Alternative Globalizations**-James Mark 2020-02-11 Globalization has become synonymous with the seemingly unfettered spread of capitalist multinationals, but this focus on the West and western economies ignores the wide variety of globalizing projects that sprang up in the socialist world as a consequence of the end of the European empires. This collection is the first to explore alternative forms of globalization across the socialist world during the Cold War. Gathering the work of established and upcoming scholars of the Soviet Union, Eastern Europe, and China, Alternative Globalizations addresses the new relationships and interconnections which emerged between a decolonizing world in the postwar period and an increasingly internationalist eastern bloc after the death of Stalin. In many cases, the legacies of these former globalizing impulses from the socialist world still exist today. Divided into four sections, the works gathered examine the economic, political, developmental, and cultural aspects of this exchange. In doing so, the authors break new ground in exploring this understudied history of globalization and provide a multifaceted study of an increasing postwar interconnectedness across a socialist world.

**Writing the Global City**-Anthony D King 2016-04-14 Over the last three decades, our understanding of the city worldwide has been revolutionized by three innovative theoretical concepts – globalisation, postcolonialism and a radically contested notion of modernity. The idea and even the reality of the city has been extended out of the state and nation and re-positioned in the larger global world. In this book Anthony King brings together key essays written over this period, much of it dominated by debates about the world or global city. Challenging assumptions and silences behind these debates, King provides largely ignored historical and cultural dimensions to the understanding of world city formation as well as decline. Interdisciplinary and comparative, the essays address new ways of framing contemporary themes: the imperial and colonial origin of contemporary world and global cities, actually existing postcolonialisms, claims about urban and cultural homogenisation and the role of architecture and built environment in that process. Also addressed are arguments about indigenous and exogenous perspectives, Eurocentricism, ways of framing vernacular architecture, and the global historical sociology of building types. Wide-ranging and accessible, Writing the Global City provides essential historical contexts and theoretical frameworks for understanding contemporary urban and architectural debates. Extensive bibliographies will make it essential for teaching, reference and research.

**Education for Sustainable Development in the Postcolonial World**-Leon Tikly 2019-12-16 Education for Sustainable Development (ESD) lies at the heart of global,
Regional and national policy agendas, with the goal of achieving socially and environmentally just development through the provision of inclusive, equitable quality education for all. Realising this potential on the African continent, however, calls for radical transformation of policy and practice. Developing a transformative agenda requires taking account of the ‘learning crisis’ in schools, the inequitable access to a good quality education, the historical role of education and training in supporting unsustainable development, and the enormous challenges involved in complex system change. In the African continent, sustainable development entails eradicating poverty and inequality, supporting economically sustainable livelihoods within planetary boundaries, and averting environmental catastrophe, as well as dealing with health pandemics and security threats. In addressing these challenges, the book explores the meaning of ESD for Africa in the context of the ‘postcolonial condition’ critically discusses the Sustainable Development Goals (SDGs) as well as regional development agendas draws on a wealth of research evidence and examples from across the continent engages with contemporary debates about the skills, competencies and capabilities required for sustainable development, including decolonising the curriculum and transforming teaching and learning relationships sets out a transformative agenda for policy-makers, practitioners, NGOs, social movements and other stakeholders based on principles of social and environmental justice. Education for Sustainable Development in the Postcolonial World is an essential read for anyone with an interest in education and socially and environmentally just development in Africa.

Nationalism and Cultural Practice in the Postcolonial World - Neil Lazarus 1999-05-20
In this wide-ranging study, Neil Lazarus explores the subject of cultural practice in the modern world system. The book contains individual chapters on a range of topics from modernity, globalization and the 'West', and nationalism and decolonization, to cricket and popular consciousness in the English-speaking Caribbean. Lazarus analyses social movements, ideas and cultural practices that have migrated from the 'First world' to the 'Third world' over the course of the twentieth century. Nationalism and Cultural Practice in the Postcolonial World offers an enormously erudite reading of culture and society in today's world and includes extended discussion of the work of such influential writers, critics and activists as Frantz Fanon, C. L. R. James, Edward Said, Gayatri Spivak, Samir Amin, Raymond Williams, Paul Gilroy and Partha Chatterjee. This book is a politically focused, materialist intervention into postcolonial and cultural studies, and constitutes a major reappraisal of the debates on politics and culture in these fields.

Offers a lucid introduction to postcolonial studies, one of the most important strands in recent literary theory and cultural studies.

**Manipulating Hegemony**-R. Vickers 2000-02-17 Drawing on neo-Gramscian theories of International Political Economy, this book explores the impact of the Marshall Plan on labour and government in Britain. Rather than the US imposing a 'politics of productivity' on an unwilling government, the centre-right of the Labour Party used the Marshall Plan to achieve its own political ends. Manipulating Hegemony shows how the government was able to marginalise the left to create a pattern of state-labour politics that was to endure until the end of the 1970s.

**Money and Power in Europe**-Matthias Kaelberer 2001-06-07 Traces the history of European monetary negotiations from the 1960s to the 1990s.

**Globalization, Utopia and Postcolonial Science Fiction**-Eric D. Smith 2012-09-10 Globalization, Utopia, and Postcolonial Science Fiction: New Maps of Hope explores the aesthetic and historical conditions that inform the recent convergence of the seemingly incommensurable domains of the postcolonial Third World and the genre of SF, particularly as expressed in the recent phenomenon of visionary SF narratives originating from postcolonial national cultures. Offering a materialist theorization of this surge of Third-World science fiction supported by careful and penetrating close readings, the book considers its formal emergence as representing a definitive shift in postcolonial literary and cultural production that finds its material provenance in the political, economic, and spatial dilemmas of globalization and its ideological vitality in the enduring project of utopian thought for the post-contemporary present.

**The Oxford Handbook of Postcolonial Studies**-Graham Huggan 2013-09-12 The Oxford Handbook of Postcolonial Studies provides a comprehensive overview of the latest scholarship in postcolonial studies, while also considering possible future developments in the field. Original chapters written by a worldwide team of contritbuors are organised into five cross-referenced sections, 'The Imperial Past', 'The Colonial Present', 'Theory and Practice', 'Across the Disciplines', and 'Across the World'. The chapters offer both country-specific and comparative approaches to current issues, offering a wide range of new and interesting perspectives. The Handbook reflects the increasingly multidisciplinary nature of postcolonial studies and reiterates its continuing relevance to the study of both the colonial past, in its multiple manifestations, and the contemporary globalized world. Taken together, these essays, the dialogues they pursue, and the editorial comments that surround them constitute nothing less than a blueprint for the future of a much-contested but intellectually vibrant and politically engaged field.

**Africa in World Affairs**-Rajen Harshé 2019-05-06 Africa finds itself at the centre stage of world politics in the twenty-first century. To truly determine its rising influence and role in
world affairs would mean unravelling the politics of imperialism, the Cold War and
globalisation. Going beyond Euro-American perspectives, this book presents a
comprehensive study of Africa and its role in world politics. Africa in World Affairs: • Closely
examines the transition of Africa in its colonial and post-colonial phases; • Explores the
intellectual history of modern Africa through liberation struggles, social movements, leaders
and thinkers; • Investigates the continent’s relationships with former colonial powers such
as Britain, France and Portugal; untangles complexities of French neo-colonialism and sheds
light on the role of the superpower, such as the USA and major and rising powers like China
and India; • Highlights complex and wide-ranging diversities of the region, and the ways in
which it continues to negotiate with issues of modernity, racism and globalisation. A core
text on Africa and the world, this book will be indispensable for students of African studies,
politics and international relations, and history. It will also be a must-read for policymakers,
diplomats and government think tanks.

**African Indigenous Knowledges in a Postcolonial World** - Olajumoke Yacob-Haliso
2020-11-29 This book argues that ancient and modern African indigenous knowledges
remain key to Africa’s role in global capital, technological and knowledge development and
to addressing her marginality and postcoloniality. The contributors engage the unresolved
problematics of the historical and contemporary linkages between African knowledges and
the African academy, and between African and global knowledges. The book relies on
historical and comparative political analysis to explore the global context for the application
of indigenous knowledges for tackling postcolonial challenges of knowledge production,
conflict and migration, and women’s rights on the continent in transcontinental African
contexts. Asserting the enduring potency of African indigenous knowledges for the
transformation of policy, the African academy and the study of Africa in the global academy,
this book will be of interest to scholars of African Studies, postcolonial studies and
decolonisation and global affairs.

**The Oxford Handbook of Global Health Politics** - Colin McInnes 2020 Protecting and
promoting health is inherently a political endeavor that requires a sophisticated
understanding of the distribution and use of power. Yet while the global nature of health is
widely recognized, its political nature is less well understood. In recent decades, the
interdisciplinary field of global health politics has emerged to demonstrate the
interconnections of health and core political topics, including foreign and security policy,
trade, economics, and development. Today a growing body of scholarship examines how the
global health landscape has both shaped and been shaped by political actors and structures.
The Oxford Handbook of Global Health Politics provides an authoritative overview and
assessment of research on this important and complicated subject. The volume is motivated by two arguments. First, health is not simply a technical subject, requiring evidence-based solutions to real-world problems, but an arena of political contestation where norms, values, and interests also compete and collide. Second, globalization has fundamentally changed the nature of health politics in terms of the ideas, interests, and institutions involved. The volume comprises more than 30 chapters by leading experts in global health and politics. Each chapter provides an overview of the state of the art on a given theoretical perspective, major actor, or global health issue. The Handbook offers both an excellent introduction to scholars new to the field and also an invaluable teaching and research resource for experts seeking to understand global health politics and its future directions.

Modernity At Large - Arjun Appadurai 1996

Questioning Hybridity, Postcolonialism and Globalization - A. Acheraïou 2011-05-17 Acheraïou analyzes hybridity using a theoretical, empirical approach that reorients debates on métissage and the 'Third Space', arguing for the decolonization of postcolonialism. Hybridity is examined in the light of globalization, indicating how postcolonial discourse could become a counter-hegemonic ethics of resistance to global neoliberal doxa.

Globalization and the Humanities - David Leiwei Li 2003-12-01 This is the most comprehensive collection to date on how economic globalization transforms contemporary humanistic inquiries on matters of fundamental cultural and political significance. Against the tyranny of the worldwide free market that naturalizes the aggregation of power for the increasingly few, the contributors to this volume at once advocate an egalitarian model of global distributive justice and cultivate a cosmopolitan communal consciousness. Writing from their diverse specialties and theoretical perspectives, the group of scholars assembled here has made the humanities a productive forum to articulate an alternative form of globalization based on universal human rights. As such, this collaborative effort counters the hegemony of neoliberal privatization and holds the promise of intellectual agency for an equitable reproduction of cultural capital in the global era. Globalization and the Humanities will be of great use for scholars and students interested in the intellectual and ideological developments of the humanities in the past three decades. It clearly anchors the debates on the canon, the inclusion of third world and minority authors, of popular cultural genres and new media forms in an emerging globalization paradigm. The anthology will prove essential for students of undergraduate and graduate levels as well for scholars in the

The New Political Economy of Development

What Is a World? - Pheng Cheah 2016-01-01

In What Is a World? Pheng Cheah, a leading theorist of cosmopolitanism, offers the first critical consideration of world literature’s cosmopolitan vocation. Addressing the failure of recent theories of world literature to inquire about the meaning of world, Cheah articulates a normative theory of literature’s world-making power by creatively synthesizing four philosophical accounts of the world as a temporal process: idealism, Marxist materialism, phenomenology, and deconstruction. Literature opens worlds, he provocatively suggests, because it is a force of receptivity. Cheah compellingly argues for postcolonial literature’s exemplarity as world literature through readings of narrative fiction by Michelle Cliff, Amitav Ghosh, Nuruddin Farah, Ninotchka Rosca, and Timothy Mo that show how these texts open up new possibilities for remaking the world by negotiating with the inhuman force that gives time and deploying alternative temporalities to resist capitalist globalization.

Colonialism/Postcolonialism - Ania Loomba 2007-05-07

Ania Loomba deftly introduces and examines: key features of the ideologies and history of colonialism the relationship of colonial discourse to literature challenges to colonialism, including anticolonial discourses recent developments in postcolonial theories and histories issues of sexuality and colonialism, and the intersection of feminist and postcolonial thought debates about globalization and postcolonialism. Recommended on courses across the academic disciplines and around the world, Colonialism/Postcolonialism has for some years been accepted as the essential introduction to a vibrant and politically charged area of literary and cultural study. With new coverage of emerging debates around globalization, this second edition will continue to serve as the ideal guide for students new to colonial discourse theory, postcolonial studies or postcolonial theory as well as a reference for advanced students and teachers.

A new history of the United States that turns American exceptionalism on its head. American Empire is a panoramic work of scholarship that presents a bold new global perspective on the history of the United States. Taking readers from the colonial era to today, A. G. Hopkins shows how, far from diverging, the United States and Western Europe followed similar trajectories throughout this long period, and how America's dependency on Britain and Europe extended much later into the nineteenth century than previously understood. A sweeping narrative spanning three centuries, American Empire goes beyond the myth of American exceptionalism to place the United States within the wider context of the global historical forces that shaped Western empires and the world.

Globalisation and Leadership in Africa - Okechukwu Ethelbert Amah 2018-09-22

Focusing on both pre-colonial and post-colonial eras, this book aims to cultivate a greater understanding of globalisation processes in the context of leadership behaviour in Africa.
Analysing empirical evidence and theoretical frameworks, the author evaluates the role of leaders in the failure of African globalisation and seeks to propose an initiative for change. As emphasis shifts from world control to regional and sub-regional control, the new face of globalisation offers an opportunity for Africa to grow and develop with a new leadership perspective. Presenting servant leadership as a solution to Africa’s global failures, this timely book explores the challenges of governance, resource management and regionalisation, and will be of value to anyone interested in the development of Africa as a continent.

**Globalization is a form of Colonialism** - 2015-01-20 Essay from the year 2011 in the subject Politics - International Politics - Topic: Globalization, Political Economics, grade: 1,3, language: English, abstract: This paper analyzes the historical phenomenon of colonialism and globalisation and the similarities in their ideologies. In addition, using examples of nations and multinational corporations, this paper tries to find economic and social connections between colonialism and globalization in the behavior of suppressor and oppressor. Furthermore, the term neo-colonialism is going to be researched and some recent examples of expansion and discrimination in different countries are shown.

**Paradise Discourse, Imperialism, and Globalization** - Sharae Deckard 2009-12-04 This comparative study, the first of its kind, discusses paradise discourse in a wide range of writing from Mexico, Zanzibar, and Sri Lanka, including novels by authors such as Malcolm Lowry, Leonard Woolf, Juan Rulfo, Wilson Harris, Abdulrazak Gurnah, and Romesh Gunesekera. Tracing dialectical tropes of paradise across the "long modernity" of the capitalist world-system, Deckard reads literature from postcolonial nations in context with colonial discourse in order to demonstrate how paradise begins as a topos motivating European exploration and colonization, shifts into an ideological myth justifying imperial exploitation, and finally becomes a literary motif used by contemporary writers to critique neocolonial representations and conditions in the age of globalization. Combining a range of critical perspectives—cultural materialist, ecocritical, and postcolonial—the volume opens up a deeper understanding of the relation between paradise discourse and the destructive dynamics of plantation, tourism, and global capital. Deckard uncovers literature from East Africa and South Asia which has been previously overlooked in mainstream postcolonial criticism, and gestures to how the utopian dimensions of the paradise myth might be reclaimed to promote cultural resistance.

**Globalisation and Education** - Bob Lingard 2020-10-28 This collection focuses on education policy in the context of globalisation and draws together influential research dealing with the interplay between education policy and globalisation. Globalisation and neo-liberalism in relation to education policy are addressed, as is the impact of the global financial crisis, the recent rise of ethno-nationalism and progressive challenges to neo-liberal hegemony. A number of chapters deal with the new spatialities instantiated by globalisation's new technology, and consider the implications for education policy. Also discussed are global policy actors (such as the OECD, EU and edu-businesses) in education policy, the significance of international large scale assessments to an emergent global policy.
field; refugees and education; English language policy and globalisation; off-shore schools; and the importance of affect in policy in the context of globalisation. The collection closes with two methodological contributions that consider the implications of globalisation in today’s critical education policy analysis. The collection is brought together in a substantial introduction that traverses the literature and research on globalisation and education policy and also situates the chapters and approaches in the collection within the field. The chapters in this book were originally published as articles in various Taylor and Francis journals.

By concentrating on issues in postcolonial nations, the authors decenter western notions of public relations practice and embrace the cultures, economies, and political structures that have been profoundly influenced by the legacy of colonialism. Instead, the authors conceptualize public relations as a communicative and relationship-building practice that can bridge the political- and cultural-economic spheres of globalization, recasting practice as a central tenet of a global social justice agenda. The purpose of this study is to examine critically how public relations is shaping globalization efforts and practices in countries that have historically experienced western control.

**The World and a Very Small Place in Africa** - Donald R. Wright 1997

This study looks at the effects of "global" phenomena -- trans-Saharan trade, European expansion, the rise of an Atlantic plantation complex, industrialization, imperialism, colonialism, world wars, growth of a world market, political independence and economic dependence -- on the way of life in Niumi, a small area at the mouth of the Gambia river in West Africa (now called The Gambia), over the last six-seven hundred years. Written in clear, accessible prose, and drawing on archival and oral traditions, the work considers global developments from a local/regional perspective.

**Multipolar Globalization** - Jan Nederveen Pieterse 2017-09-07

Like a giant oil tanker, the world is slowly turning. The rapid growth of economies in Asia and the global South has led to a momentous shift in the world order, leaving much of the traditional literature on globalization behind. Multipolar Globalization: Emerging Economies and Development is the perfect guide to these ongoing 21st-century transformations, combining engaging and wide-ranging coverage with cutting-edge analysis. The rise of China and other emerging economies has led to the emergence of a new geography of trade, new economic and political combinations, new financial actors, investors and donors, and weaker American hegemony. This interdisciplinary volume combines development studies, global political economy, sociology, and cultural studies to ask what this growth means for domestic and global inequality and examines the role of multipolarity in the reshaping of globalization. Renowned globalization scholar Jan Nederveen Pieterse deftly guides the reader through the development of globalization in the West and the East, explaining key topics such as the 2008 crash, trends in inequality, the changing fortunes of the BRICs, and the role of governance and democracy. Accessible and insightful, this book will be an essential guide for both students in the social sciences and for professionals and scholars seeking a fresh
perspective.

**Globalization's Contradictions** - Dennis Conway 2006-11-22 Since the 1980s, globalization and neoliberalism have brought about a comprehensive restructuring of everyone’s lives. People are being ‘disciplined’ by neoliberal economic agendas, ‘transformed’ by communication and information technology changes, global commodity chains and networks, and in the Global South in particular, destroyed livelihoods, debilitating impoverishment, disease pandemics, among other disastrous disruptions, are also globalization’s legacy. This collection of geographical treatments of such a complex set of processes unearths the contradictions in the impacts of globalization on peoples’ lives. Globalizations Contradictions firstly introduces globalization in all its intricacy and contrariness, followed on by substantive coverage of globalization’s dimensions. Other areas that are covered in depth are: globalization’s macro-economic faces globalization’s unruly spaces globalization’s geo-political faces ecological globalization globalization’s cultural challenges globalization from below fair globalization. Globalizations Contradictions is a critical examination of the continuing role of international and supra-national institutions and their involvement in the political economic management and determination of global restructuring. Deliberately, this collection raises questions, even as it offers geographical insights and thoughtful assessments of globalization’s multifaceted ‘faces and spaces.’

**The Clash of Globalisations** - Ray Kiely 2005-03-01 This book provides a powerful critique of the case made for ‘globalisation’, with particular emphasis placed on neo-liberalism, the third way, and the hegemonic role of the US state. It then examines the rise of ‘anti-globalisation’ politics and the debate over progressive alternatives to ‘actually existing globalisation’.

**Postcolonial Piracy** - Lars Eckstein 2014-10-23 Across the global South, new media technologies have brought about new forms of cultural production, distribution and reception. The spread of cassette recorders in the 1970s; the introduction of analogue and digital video formats in the 80s and 90s; the pervasive availability of recycled computer hardware; the global dissemination of the internet and mobile phones in the new millennium: all these have revolutionised the access of previously marginalised populations to the cultural flows of global modernity. Yet this access also engenders a pirate occupation of the modern: it ducks and deranges the globalised designs of property, capitalism and personhood set by the North. Positioning itself against Eurocentric critiques by corporate lobbies, libertarian readings or classical Marxist interventions, this volume offers a profound postcolonial revaluation of the social, epistemic and aesthetic workings of piracy. It projects how postcolonial piracy persistently negotiates different trajectories of property and self at the crossroads of the global and the local.
