The Death of Luigi Trastulli and Other Stories-Alessandro Portelli 2010-03-30 Portelli offers a new and challenging approach to oral history, with an interdisciplinary and multicultural perspective. Examining cultural conflict and communication between social groups and classes in industrial societies, he identifies the way individuals strive to create memories in order to make sense of their lives, and evaluates the impact of the fieldwork experience on the consciousness of the researcher. By recovering the value of the story-telling experience, Portelli’s work makes delightful reading for the specialist and non-specialist alike. Alessandro Portelli is Professor of American Literature at the University of Rome “La Sapienza.”

Music and Tradition-Laurence Ernest Rowland Picken 1981-01-29 The book aims to reflect characteristic aspects of Dr Picken’s study of Oriental and other non-Western musics. Appealing in particular to those engaged in the study of non-Western music, the volume will also interest everyone concerned with musical structures and their development.

In the Course of Performance-Bruno Nettl 1998-12-15 In the Course of Performance is the first book in decades to illustrate and explain the practices and processes of musical improvisation.
Improvisation, by its very nature, seems to resist interpretation or elucidation. This difficulty may account for the very few attempts scholars have made to provide a general guide to this elusive subject. With contributions by seventeen scholars and improvisers, *In the Course of Performance* offers a history of research on improvisation and an overview of the different approaches to the topic that can be used, ranging from cognitive study to detailed musical analysis. Such diverse genres as Italian lyrical singing, modal jazz, Indian classical music, Javanese gamelan, and African-American girls' singing games are examined. The most comprehensive guide to the understanding of musical improvisation available, *In the Course of Performance* will be indispensable to anyone attracted to this fascinating art. Contributors are Stephen Blum, Sau Y. Chan, Jody Cormack, Valerie Woodring Goertzen, Lawrence Gushee, Eve Harwood, Tullia Magrini, Peter Manuel, Ingrid Monson, Bruno Nettl, Jeff Pressing, Ali Jihad Racy, Ronald Riddle, Stephen Slawek, Chris Smith, R. Anderson Sutton, and T. Viswanathan.

**Music and Musical Thought in Early India** Lewis Rowell 2015-12-25 Offering a broad perspective of the philosophy, theory, and aesthetics of early Indian music and musical ideology, this study makes a unique contribution to our knowledge of the ancient foundations of India's musical culture. Lewis Rowell reconstructs the tunings, scales, modes, rhythms, gestures, formal patterns, and genres of Indian music from Vedic times to the thirteenth century, presenting not so much a history as a thematic analysis and interpretation of India's magnificent musical heritage. In Indian culture, music forms an integral part of a broad framework of ideas that includes philosophy, cosmology, religion, literature, and science. Rowell works with the known theoretical treatises and the oral tradition in an effort to place the technical details of musical practice in their full cultural context. Many quotations from the original Sanskrit appear here in English translation for the first time, and the necessary technical information is presented in terms accessible to the nonspecialist. These features, combined with Rowell's glossary of Sanskrit terms and extensive bibliography, make *Music and Musical Thought in Early India* an excellent introduction for the general reader and an indispensable reference for ethnomusicologists, historical musicologists, music theorists, and Indologists.

**The Traditional Indian Theory and Practice of Music and Dance** Jonathan Katz 1992 These articles concern the role of the Sanskrit tradition in the performing arts in India. They consider the relations between theory and practice in music and dance with particular reference to the Sanskrit textual tradition of musicology.

**Sonic Liturgy**

Guy L. Beck (2012-12-12) Sonic Liturgy: Ritual and Music in Hindu Tradition builds on the foundation of Guy L. Beck's earlier work, Sonic Theology: Hinduism and Sacred Sound, which described the theoretical role of sound in Hindu thought. Sonic Liturgy continues the discussion of sound into the realm of Hindu ritual and musical traditions of worship. Beginning with the chanting of the Sama-Veda alongside the fire sacrifices of the ancient Indo-Aryans and with the classical Gandharva music as outlined in the musicological texts of Bharata and Dattila, Beck establishes a historical foundation for an in-depth understanding of the role of music in the early Puja rituals and Indian theater, in the vernacular poetry of the Bhakti movements, in medieval temple worship of Siva and Vishnu in southern India, and later in the worship of Krishna in the northern Braj region. By surveying a multitude of worship traditions, and drawing upon diverse sources in both Sanskrit and vernacular languages, Beck reveals a continuous template of interwoven ritual and music in Hindu tradition that he terms "sonic liturgy," a structure of religious worship and experience that incorporates sound and music on many levels. In developing the concept and methods for understanding the phenomenon of sonic liturgy, Beck draws from liturgical studies and ritual studies, broadening the dimensions of each, as well as from recent work in the fields of Indian religion and music. As he maps the evolution of sonic liturgy in Hindu culture, Beck shows how, parallel to the development of religious ritual from ancient times to the present, there is a less understood progression of musical form, beginning with Vedic chants of two to three notes to complicated genres of devotional temple music employing ragas with up to a dozen notes. Sonic liturgy in its maturity is manifest as a complex interactive worship experience of the Vaishnava sects, presented here in Beck's final chapters.
