**We are an African People**-Russell John Rickford 2016 By 1970, more than 60 "Pan African nationalist" schools, from preschools to post-secondary ventures, had appeared in urban settings across the United States. The small, independent enterprises were often accused of teaching hate and were routinely harassed by authorities. Yet these institutions served as critical mechanisms for transmitting black consciousness. Founded by activist-intellectuals, the schools strove not simply to bolster the academic skills and self-esteem of inner-city African-American youth but also to decolonize minds and embody the principles of self-determination and African identity. In *We Are An African People*, historian Russell Rickford traces the brief lives of these autonomous black institutions created to claim some of the self-determination that the integrationist civil rights movement had failed to provide. Influenced by Third World theorists and anticolonial movements, organizers of the schools saw formal education as a means of creating a vanguard of young activists devoted to the struggle for black political sovereignty throughout the world. Most of the schools were short-lived, but their stories have much to tell us about Pan Africanism as a social and intellectual movement and as a key part of an indigenous black nationalism. A former
journalist, Rickford uses a virtually unknown movement to explore black nationhood and a particularly fertile period of political, cultural, and social revitalization that envisioned an alternate society.

**Beyond Ebonics**-John Baugh 2000-02-10 The media frenzy surrounding the 1996 resolution by the Oakland School Board brought public attention to the term "Ebonics", however the idea remains a mystery to most. John Baugh, a well-known African-American linguist and education expert, offers an accessible explanation of the origins of the term, the linguistic reality behind the hype, and the politics behind the outcry on both sides of the debate. Using
a non-technical, first-person style, and bringing in many of his own personal experiences, Baugh debunks many commonly-held notions about the way African-Americans speak English, and the result is a nuanced and balanced portrait of a fraught subject. This volume should appeal to students and scholars in anthropology, linguistics, education, urban studies, and African-American studies.

**African American Vernacular English**-John Russell Rickford 1999-07-16 In response to the flood of interest in African American Vernacular English (AAVE) following the recent controversy over "Ebonics," this book brings together sixteen essays on the subject by a leading expert in the field, one who has been researching and writing on it for a quarter of a century.

**Out of the Mouths of Slaves**-John Baugh 1999 When the Oakland, California, school board called African American English "Ebonics" and claimed that it "is not a black dialect or any dialect of English," they reignited a debate over language, race, and culture that reaches back to the era of slavery in the United States. In this book, John Baugh, an authority on African American English, sets new parameters for the debate by dissecting and challenging many of the prevailing myths about African American language and its place in American
society. Baugh's inquiry ranges from the origins of African American English among slaves and their descendants to its recent adoption by standard English speakers of various races. Some of the topics he considers include practices and malpractices for educating language minority students, linguistic discrimination in the administration of justice, cross-cultural communication between Blacks and whites, and specific linguistic aspects of African American English. This detailed overview of the main points of debate about African American language will be important reading for both scholars and the concerned public.

Soul City- Thomas Healy 2021-02-02 A New York Times Book Review Editors’ Choice The fascinating, forgotten story of the 1970s attempt to build a city dedicated to racial equality in the heart of “Klan Country” In 1969, with America’s cities in turmoil and racial tensions high, civil rights leader Floyd McKissick announced an audacious plan: he would build a new city in rural North Carolina, open to all but intended primarily to benefit Black people. Named Soul City, the community secured funding from the Nixon administration, planning help from Harvard and the University of North Carolina, and endorsements from the New York Times and the Today show. Before long, the brand-new settlement – built on a former slave plantation – had roads, houses, a health care center, and an industrial plant. By the year 2000, projections said, Soul City would have fifty thousand residents. But the utopian vision was not to be. The race-baiting Jesse Helms, newly elected as senator from North Carolina, swore to stop government spending on the project. Meanwhile, the liberal Raleigh News & Observer mistakenly claimed fraud and corruption in the construction effort. Battered from the left and the right, Soul City was shut down after just a decade. Today, it is
a ghost town – and its industrial plant, erected to promote Black economic freedom, has been converted into a prison. In a gripping, poignant narrative, acclaimed author Thomas Healy resurrects this forgotten saga of race, capitalism, and the struggle for equality. Was it an impossible dream from the beginning? Or a brilliant idea thwarted by prejudice and ignorance? And how might America be different today if Soul City had been allowed to succeed?

That Halloween morning in Kauai, Hawaii Bethany responded to the shark's stealth with a calmness beyond belief. Pushing pain and panic aside, she immediately thought: 'Get to the beach...'. Rushed to the hospital, where her father, Ted Hamilton, was about to undergo knee surgery, Bethany found herself taking his spot in the operating theatre. When the first thing Bethany wanted to know after surgery was 'When can I surf again?' it became clear that her unfaltering spirit and determination were part of a greater story - a tale of courage and faith that this modest and soft-spoken girl would come to share with the world.

Achilles, 'best of all the Greeks', is everything Patroclus is not - strong, beautiful, the child of
a goddess - and by all rights their paths should never cross. Yet one day, Achilles takes the shamed prince under his wing and soon their tentative companionship gives way to a steadfast friendship. As they grow into young men skilled in the arts of war and medicine, their bond blossoms into something far deeper - despite the displeasure of Achilles's mother Thetis, a cruel and deathly pale sea goddess with a hatred of mortals. Fate is never far from the heels of Achilles. When word comes that Helen of Sparta has been kidnapped, the men of Greece are called upon to lay siege to Troy in her name. Seduced by the promise of a glorious destiny, Achilles joins their cause, Torn between love and fear for his friend, Patroclus follows Achilles into war, little knowing that the years that follow will test everything they have learned, everything they hold dear. And that, before he is ready, he will be forced to surrender his friend to the hands of Fate. Speech Communities-Marcyliena H. Morgan 2014-02-20 What makes a speech community? How do they evolve? How are speech communities identified? Speech communities are central to our understanding of how language and interactions occur in societies around the world and in this book readers will find an overview of the main concepts and critical arguments surrounding how language and communication styles distinguish and identify groups. Speech communities are not organized around linguistic facts but around people who want to share their opinions and identities; the language we use constructs, represents and embodies meaningful participation in society. This book focuses on a range of speech communities, including those that have developed from an increasing technological world where migration and global interactions are common. Essential reading for graduate students and researchers in linguistic anthropology, sociolinguistics and applied linguistics.

The Black Side of the River-Jessica A. Grieser 2022-02 An insightful exploration of the impact of urban change on Black culture, identity, and language Across the United States, cities are changing. Gentrification is transforming urban landscapes, often pushing local
Black populations to the margins. As a result, communities with rich histories and strong identities grapple with essential questions. What does it mean to be from a place in flux? What does it mean to be a specific kind of person from that place? What does gentrification mean for the fabric of a community? In The Black Side of the River, sociolinguist Jessi Grieser draws on ten years of interviews with dozens of residents of Anacostia, a historically Black neighborhood in Washington, DC, to explore these ideas through the lens of language use. Grieser finds that residents use certain speech features to create connections among racial, place, and class identities; reject negative characterizations of place from those outside the community; and negotiate ideas of belonging. In a neighborhood undergoing substantial class gentrification while remaining decisively Black, Grieser finds that Anacostians use language to assert a positive, hopeful place identity that is inextricably intertwined with their racial one. Grieser's work is a call to center Black lived experiences in urban research, confront the racial effects of urban change, and preserve the rich culture and community in historic Black neighborhoods, in Washington, DC, and beyond.
