Grammatical and Sociolinguistic Aspects of Ethiopian Languages-Derib Ado 2021-04-15 The focus of this unique publication is on Ethiopian languages and linguistics. Not only major languages such as Amharic and Oromo receive attention, but also lesser studied ones like Sezo and Nuer are dealt with. The Gurage languages, that often present a descriptive and sociolinguistic puzzle to researchers, have received ample coverage. And for the first time in the history of Ethiopian linguistics, two chapters are dedicated to descriptive studies of Ethiopian Sign Language, as well as two studies on acoustic phonetics. Topics range over a wide spectrum of issues covering the lexicon, sociolinguistics, socio-cultural aspects and micro-linguistic studies on the phonology, morphology and syntax of Ethiopian languages.

Language Use In Ethiopia from A Network Perspective-Ronny Meyer 2003 “This publication describes the usage of languages in the multilingual society of Ethiopia. It is based on empirical studies conducted in nine states of the Federal Democratic Republic of Ethiopia in 1997 and 1998. A research team of German and Ethiopian scholars surveyed about 3,500 high school students from 35 Ethiopian towns regarding their language behaviour. The data on the distribution of mother tongues and second languages are published here for the first time and are representative for a typical Ethiopian town. These data outline the development of multilingualism over three generations (students/parents/grandparents) and elucidate factors which promote the spread of multilingualism. The frame for the representation and explanation of the data is an adapted model of the social network theory.”

Language Policy in Ethiopia-Mekonnen Alemu Gember Yohannes 2021-03-22 This book examines the interplay and tensions between hegemonic and counter-hegemonic language policy and processes in Tigray, a regional state of Ethiopia, in the period of pre- and post-1991. Viewing language use and language policy as dynamic social and ideological processes, the book presents Ethiopia as an example of different language policies and practices were put in place as the country’s leaders changed through political takeovers. Declared language policies were not always implemented, and those implemented were often protested. The book starts with an overview and review of language policy and planning, followed by a chapter on the history of such planning in Ethiopia. It then presents the methodology used for the study, and examines the appropriation of hegemonic LPP, patterns of resistance, schools and public sites as centers of resistance, and the emergence and development of specific patterns of language use in different regions of the country. The book ends with recommendations for future research, and draws the overall conclusion that since LPP is a dynamic and multilayered contextual process, official or de facto language policy is often undermined by overt or covert unofficial language policies, ideologies, mechanisms, and agents that result in different patterns of language use.

Interaction of Morphology and Syntax-Zygmunt Frajzyngier 2008 The present volume deals with hitherto unexplored issues on the interaction of morphology and syntax. These selected and invited papers mainly concern Cushitic and Chadic languages, the least-described members of the Afroasiatic family. Three papers in the volume explore one or more typological characteristics across an entire language family or branch, while others focus on one or two languages within a family and the implications of their structures for the family, the phylogeny, or linguistic typology as a whole. The diversity of topics addressed within the present volume reflects the great diversity of language structures and functions within the Afroasiatic phyllum.

Language Ideologies and Challenges of Multilingual Education in Ethiopia-Mogens Yipper 2010 During the last decade and a half, The use of local languages for official purposes, particularly in primary education, has become a pronounced characteristic of Ethiopian education system. The fact that as many as 22 languages have been introduced into the school system since mid 1990s represents a major ideological shift from the previous policies the country had adopted over the course of several centuries. The Ethiopian educational language policy is radical in its scope and unique in Sub-Saharan Africa and elsewhere, and it invites a close examination of its ideological foundation and, even more so, its implementation model. The primary objective of this study was to make a critical appraisal of the implementation of vernacular education in the Harari region and examine the challenges of providing primary education in several Ethiopian and international languages, i.e. English, Amharic, Oromo, Arabic and Harari. The study made a comparative assessment of the use of languages as media of instruction for primary education, and concluded with an appraisal of the relative strengths and weaknesses in the use of each language, from both pedagogical and social perspectives.

Modern AfAan Oromo Grammar—TaHa M. Roba 2017-03-16 This publication is the second edition of the Oromo Textbook. It is designed to teach the Oromo language to those who can speak the language but are unable to read it; for those children who were born and live outside their homeland; and for those who are interested in learning one of the major languages of Africa. The Oromo language is spoken by close to 40 million people in Ethiopia and northern Kenya and is the second or third largest language in Africa. It is a testament to the resilience of the Oromo language and how it survived over a century of Abyssinian onslaught and suppression. By reading this handbook one can grasp aspects of Oromo culture, systems of thought the principle of social organization and the art of communication. Rare among Oromo educational material, this volume reads smoothly, from learning the sounds of Oromo alphabets also known as qeebo, to reading, and understanding the Oromo language. This work is distinct because it brings out the Oromo oral tradition. It is loaded with specific ways Oromos learned, thought, and preserved their language and culture, the essence of their Oommummu (Oonomnnox). This book strives to fill the void of Oromo educational material not only in North America, but also in Oromia (Ethiopia), where teaching and learning the Oromo language outlawed by successive Ethiopian regimes and not sufficiently developed under the current government. This book will undoubtedly emerge as a conversation and discussion piece in the learning and teaching of the Oromo language, Oromo history and tradition of the Oromo people.

On Results of the Reform in Ethiopia's Language and Education Policies—Catherine Griepenwe-Mewis 2009 This publication reflects the results of the Ethiopian education reform as well as the exceptional efforts that multilingual Ethiopia undertakes in order to cope with the challenges arising from the population explosion. More than 55 per cent of the 77 million Ethiopians are under the age of 18 years. The great social and political changes started in Ethiopia at the beginning of the 1990s have resulted in the substitution of the educational system based on Amharic and English by one which uses a multilingual approach. According to the Ministry of Education 22 out of the 84 languages spoken in Ethiopia are now used as media of instruction in primary schools. The book presents the lectures delivered at the workshop “On the Results of the Reform in Ethiopia’s Language and Education Policy” held at Addis Ababa University in 2006 by Ethiopian education experts and a German research team. Their contribution has facilitated a subsumption into the historical context and has given insight into the analyses of the use of 8 Ethiopian languages in primary schools in different regions of the country.

The Semitic Languages—Stefan Weninger 2012-01-01 The handbook The Semitic Languages offers a comprehensive reference tool for Semitic Grammar in its broad sense. It is not restricted to comparative Grammar, although it covers also comparative aspects, including classification. Articles on individual languages and dialects give basic facts as location, numbers of speakers, scripts, number of exist extant texts and their nature, attestation where appropriate, and salient features of the grammar and lexicon of the respective variety. The handbook is the most comprehensive treatment of the Semitic language family since many decades.

Eurasian Empires as Blueprints for Ethiopia—Asnake Kefale 2021-02-14 This book is a contribution to the global history of the transfer of political ideas, as exemplified by the case of modern Ethiopia. Like many non-European nation-states, Ethiopia adopted a western model of statehood, that is, the nation-state. Unlike the postcolonial polities that have retained the mode of statehood imposed on them by their colonial powers, Ethiopia was never successfully colonized leaving its ruling elite free to select a model of ‘modern’ (western) statehood. In 1931, via Japan, they adopted the model of unitary, ethnolinguistically homogenous nation-state, in turn copied by Tokyo in 1889. Following the Ethiopian Revolution (1974) that overthrew the imperial system, the new revolutionary elite promised to address the ‘nationality question’ through the marxist-leninist model. The Soviet model of ethnolinguistic federalism (originally found in Ethiopia) was introduced in Ethiopia, first in 1992 and officially with the 1995 Constitution. To this day the politics of modern Ethiopia is marked by the tension between these two opposed models of the essentially central European type of statehood. The late 19th-century ‘German-German’ quarrel on the ‘proper’ model of national statehood for Germany — or more broadly, modern central Europe - remains the quarrel of Ethiopian politics nowadays. The book will be useful for scholars of Ethiopian and African history and politics, and it offers a comparative study on the subject of different models of national statehood elsewhere.

Challenges for Language Education and Policy—Bernard Spolsky 2014-09-15 Addressing a wide range of issues in applied linguistics, sociolinguistics, and multilingualism, this volume focuses on language users, the ‘people.’ Making creative connections between existing scholarship in language policy and contemporary theory and research in other social sciences, authors from around the world offer new critical perspectives for analyzing language phenomena and language theories, suggesting new meeting points among language users and language policy makers, norms, and traditions in diverse cultural, geographical, and historical contexts. Identifying and expanding on previously neglected aspects of language studies, the book is inspired by the work of Elina Shohamy, whose critical view and innovative work on a broad spectrum of key topics in...
applied linguistics has influenced many scholars in the field to think "out of the box" and to reconsider some basic commonly held understandings, specifically with regard to the impact of language and languaging on individual language users rather than on the masses.

Languages in Africa-Elizabeth C. Zaiga 2015-03-03 People in many African communities live within a series of concentric circles when it comes to language. In a small group, a speaker uses an often unwritten and endangered mother tongue that is rarely used in school. A national indigenous language—written, widespread, sometimes used in school—surrounds it. An international language like French or English, a vestige of colonialism, carries prestige, is used in higher education, and promises mobility—and yet it will not be well known by its users. The essays in Languages in Africa explore the layers of African multilingualism as they affect language policy and education. Through case studies ranging across the continent, the contributors consider multilingualism in the classroom as well as in domains ranging from music and film to politics and figurative language. The contributors report on the widespread devaluing and even death of indigenous languages. They also investigate how poor teacher training leads to language-related failures in education. At the same time, they demonstrate that education in a mother tongue can work, linguists can use their expertise to provoke changes in language policies, and linguistic creativity thrives in these multilingual communities.

Jamaican Speech Forms in Ethiopia-Renato Toreni 2015-04-01 This book is the first systematic cross-disciplinary survey on the use of Jamaican English in Ethiopia, describing the dynamics of language acquisition in a multi-lectal and multicultural context. It is the result of over eight years' worth of research conducted in both Jamaica and Africa, and is a recognition of the trans-cultural influence of the "Repatriation Movement" and other diasporic movements. The method and materials adopted in this book point to a constant spread and diffusion of Jamaican culture in Ethiopia. This is reinforced by the universalistic appeal of Rastafarianism and Reggae music and their ability to transcend borders. The data gathered here focus on how an Anglophone-based Creole has developed new speech-forms and has been hybridized and cross-fertilized in contact situations and by new media sources. The book focuses on the use of Jamaican English in four particular domains: namely, school, street, family, and the music studio. Its findings are drawn from an exceptional range of sources, such as field-work and video-recordings, interviews, web-mediated communication, artistic performance and relevant transcriptions. These sources highlight five topics of relevance—language acquisition and choice; English and Jamaican speech forms; hegemonic and minority groups, Rastafarian culture and Reggae music—which are explored in further detail throughout the book. These salient features, in turn, interface with the dynamics of influencing factors, reinforcing circumstances, significance and change. The book represents a journey to the "extreme-outer circle" of English language use, following a circular route away from Africa and back again, with all the languages used (and lost) along the slavery route and inside the plantation complex developing into creolized speech forms and Creoles. Such language use is now making its way back to Africa, with all the incendiary creativity of Reggae and resonant with Rastafarian language.
