Schools Of Thought - Fifteen years of interpretive social science

The answer, in brief, is yes. The achievement gap between children from high- and low-income families is roughly 30 to 40 percent larger among children born in 2001 than among those born twenty-five years earlier. In fact, it appears that the income achievement gap has been growing for at least fifty years, though the data are not clear for

Selective Amplification of the Genome Surrounding Key Regulatory Polyadenylation is thought to be an efficient mechanism of increasing the content of the genome by avoiding the costly and slow process of cytoplasmatic [1, 2, 3]. Polyadenylation can also affect gene regulation by amplifying a subset of genomic regions required for specific cellular function [1, 2, 3].
